Antercrëp

Arabba – IT – 2024

Length	789 m	Vehicles	36
Height difference	250 m	Power (kW)	440 kW
Throughput per hour	2.200	Towers	9

The new detachable 6-seater chairlift “Antercrëp” marks a significant step forward in the modernization of the Arabba/Marmolada skiing area on the Sellaronda ski circuit. The ropeway replaces a 40-year-old 2-seater chairlift and offers skiers and snowboarders much more convenient and efficient transportation.

It is equipped with individual footrests and premium upholstery and can transport up to 1,800 passengers per hour along the 1,200-meter route in less than four minutes. The CD6 “Antercrëp” considerably improves access to the Passo Padon and takes ride comfort to a whole new level. Among the highlights of this new and improved link are the breathtaking panoramic views skiers can savor of the Marmolada, the highestmountain group in the Dolomites, during the ascent.
