La Mayt

Vars – FR – 2022

Length	2.251 m	Vehicles	104
Height difference	609 m	Power (kW)	882 kW
Throughput per hour	2.800	Towers	21

With its multiple snow parks, children's areas, and other attractive features, the La Forêt Blanche ski resort appeals to different target groups. Its diverse facilities, combined with its picturesque setting and well-maintained slopes, make this region one of France's most popular skiing areas. La Forêt Blanche, lying between 1650 and 2750 meters in altitude, has 185 kilometers of pistes, making it one of the largest ski resorts in France.

So it requires ropeways of the highest quality. Spanning a length of just under 2.5 kilometers, the new CD6 La Mayt system ascends over 600 meters and carries up to 2800 people per hour. This modern LEITNER chairlift replaces an old 4-seater ropeway and a surface lift, providing a comfortable connection to the top station beneath the peak of La Mayt, at 2470 m.
