LEITNER ropeways has constructed a new 8-seater chairlift in Hundfjället in place of a surface lift, which carries guests directly to the summit of Långbackarna and thus also to the centerpiece in the west of the family ski resort. The entrance to many ski slopes of different levels of difficulty is located here.

With the new chairlift, this area of the ski resort can now be reached even more quickly and in a more modern and attractive way. Fitted with weather protection bubbles, seat heating, a LEITNER DirectDrive and Premium chairs, this system has also been implemented with stations in Pininfarina design for the first time in Scandinavia.
