Geißkopfbahn

Bischofsmais – DE – 2020

Length	1.125 m	Vehicles	56
Height difference	264 m	Power (kW)	368 kW
Throughput per hour	2.400	Towers	8

By choosing a LEITNER 6-seater chairlift, the operators of the Geisskopf ropeway in the Bavarian Forest have made a strong modernizing statement after more than 50 years, and can now offer a comfortable connection that is perfectly tailored to the needs of Geisskopf's visitors. The new bottom station featuring 90-degree entry is situated at the foot of the family slope and blends harmoniously into its surroundings on account of its attractive, sustainable wood and glass design.

In summer, the ropeway provides transport for up to six walkers or up to three bikes and two walkers per chair. This is a significant improvement for bikers, who often used to have to put up with very long queues. There are a number of new ways of using the lift in winter too, when skiers and tobogganers can ride together on one chair along with their sports equipment (one or two tobogganers plus one to four skiers/snowboarders).
