MK Maiskogelbahn

Kaprun – AT – 2018

Length	3.811 m	Vehicles	123
Height difference	802 m	Power (kW)	1.714 kW
Throughput per hour	2.800	Towers	27

A long-held wish for a new gondola lift on the Maiskogel in Kaprun has slowly become reality. The new 10-passenger gondola lift ensures that guests can directly access the ski resort from their favorite winter sports destination and, in a further expansion step, they will be able to reach the glacier ski resort on the Kitzsteinhorn in a tricable gondola lift.

The opening of the 10-passenger gondola lift to the Maiskogel is just the first step. In future, guests will also no longer need to travel to the lift station by car but instead can access it easily on foot.
