Vipiteno, June 2025

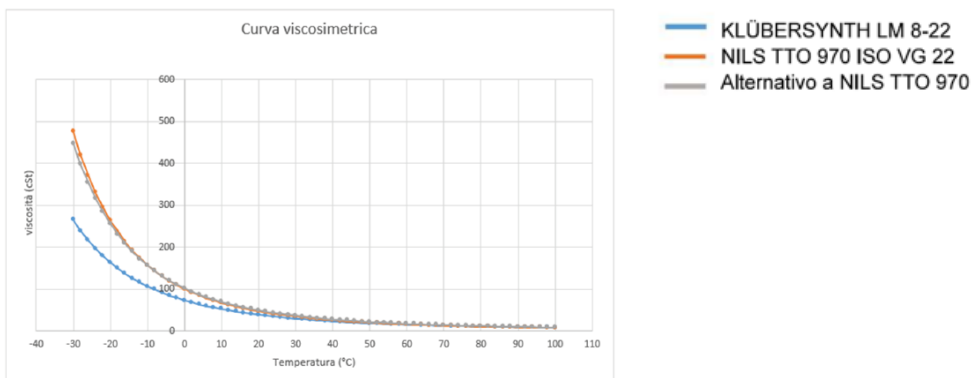

## New product Klübersynth LM 8-22

Dear Customers,

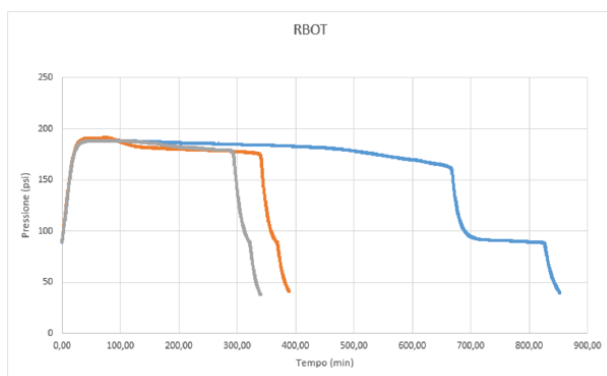

We would like to inform you that starting from 2025, our hydraulic systems for brakes and tensioning will be filled with the new **Klübersynth LM 8-22** oil (code 27011368), replacing the previous **NILS TTO 970 VG22** (code 10100341).

This decision was made after a thorough technical due diligence, due to the **improved performance** of the new product. Specifically:

- The viscosity index improves from **291** to **349**, ensuring better fluidity at low temperatures.

- The oil lifetime is twice as long, improving efficiency and reducing maintenance needs.

## ServiceInfo 2/2025

♦ **Important:** This change **does not apply** to **NILS TTO 971 VG15** (code 10100344), which will continue to be used in systems with hydraulic lines longer than 6 meters, typically found in older installations.

Please feel free to reach out for any questions or clarifications.
