

Non-destructive testing of brake components

To ensure safe operation of the brakes, it is a legal requirement that some components are regularly checked by a non-destructive method.

From this year some of our hydraulic service technicians have the ability to perform non-destructive testing (MT / VT). Therefore we are able to provide a complete service, including non-destructive testing in the revision of emergency- and service brakes. In a further step, we will expand our capabilities in order to offer an even wider range of non-destructive testing for you. For a quote or further information, please contact your account manager.

Slide bearing bushings for rope grips

In the future, the slide bearing bushings of type Fiberglide (metal bushing with fabric inlay) will be replaced by plastic bushings of type IGUS. This product is already successfully used for many years and has the advantage that it is cheaper, and in light wear the appropriate bolts are not damaged. You can always contact your responsible person for spare parts to receive an advice.

Attached you will find all material numbers with the corresponding order numbers. Please add this replacement, where appropriate, also in your operating manual.

Rope grips LEITNER LA23-LA48-LA612 – Slide bearing NEW

Rope grip LA 23

Material number old	Material number new	
Slide bearing 00033300	Slide bearing 20015615 22/25DX20
