

PRODUCT DESCRIPTION

Lubricating grease for pins - bushings / pins - bore applications of roller batteries.

YOUR BENEFITS AT A GLANCE

- Increase of the relubrication intervals for the roller batteries.
- Reduction of costs for relubrication due to the long life time of the product, which is more resistant to water and contaminating substances.
- Good wear and corrosion protection helps reduce stresses during disassembly and prevents wear due to coupling and friction.

YOUR REQUIREMENTS - OUR SOLUTION

- LP LONGLIFE is a white/beige universal lubricating grease that offers benefits especially in friction points with small to minimum movements under high static, quasi-static and dynamic loads.

APPLICATION

LP LONGLIFE is a customized grease specifically designed for roller batteries in the ropeways sector. Its advanced formula helps to reduce friction and wear on pin-bush and pin-bore connections, while also providing excellent protection against corrosion.

By using LP LONGLIFE, customers can prolong relubrication intervals and reduce the need for maintenance work on the line of ropeways. Its high-performance properties make LP LONGLIFE an optimal choice for those seeking a long-lasting and cost-effective solution.

APPLICATION NOTES

Clean and degrease the surfaces thoroughly. Then apply the grease in a thin, coherent layer by means of a brush or cloth that does not fray (do not rub in).
