

PREMIUM CHAIR EVO

EXPERIENCE A NEW DIMENSION OF COMFORT

Evolution means building on existing strengths, which is just what we did with our Premium Chair EVO. The new, upgraded version offers even more ride comfort and safety. **Simply EVOLution.**

PREMIUM DESIGN & QUALITY

Our Premium Chair EVO impresses not only with the proven seating comfort, but also with its simple elegance. Its premium materials, like leather, are just as impressive as the discerning design. **It turns a standard chairlift ride into a premium class experience.**

HEATED SEATS

Now, your guests never need to worry about low temperatures thanks to the heatable seats. Separate heating elements for every seat not only guarantee high reliability and availability, they also greatly simplify maintenance.

COMFORT UPHOLSTERY

Used successfully for years in numerous installations, the comfort variant has not only proven itself, it even sets the standard for modern chairlifts.

MORE HEADROOM

Vision has always been important to LEITNER. That is why it is clear that our Premium Chair EVO offers an unimpeded panorama view even when the bubble is closed. The bubble's unique curve ensures that your guests never feel cramped, and can enjoy every minute of the journey.

GENEROUS EXIT OPENING

Our new exit opening allows even particularly large guests to board and deboard safely. As a result, there is no longer a risk of passengers banging their heads.

MORE COMFORT AT THE SIDES

The redesigned side walls are made of shock-absorbing material. That provides additional comfort for the passengers and a visual upgrade of the new Premium Chair EVO.

TECHNOLOGY & INNOVATION

TIME-SAVING MAINTENANCE

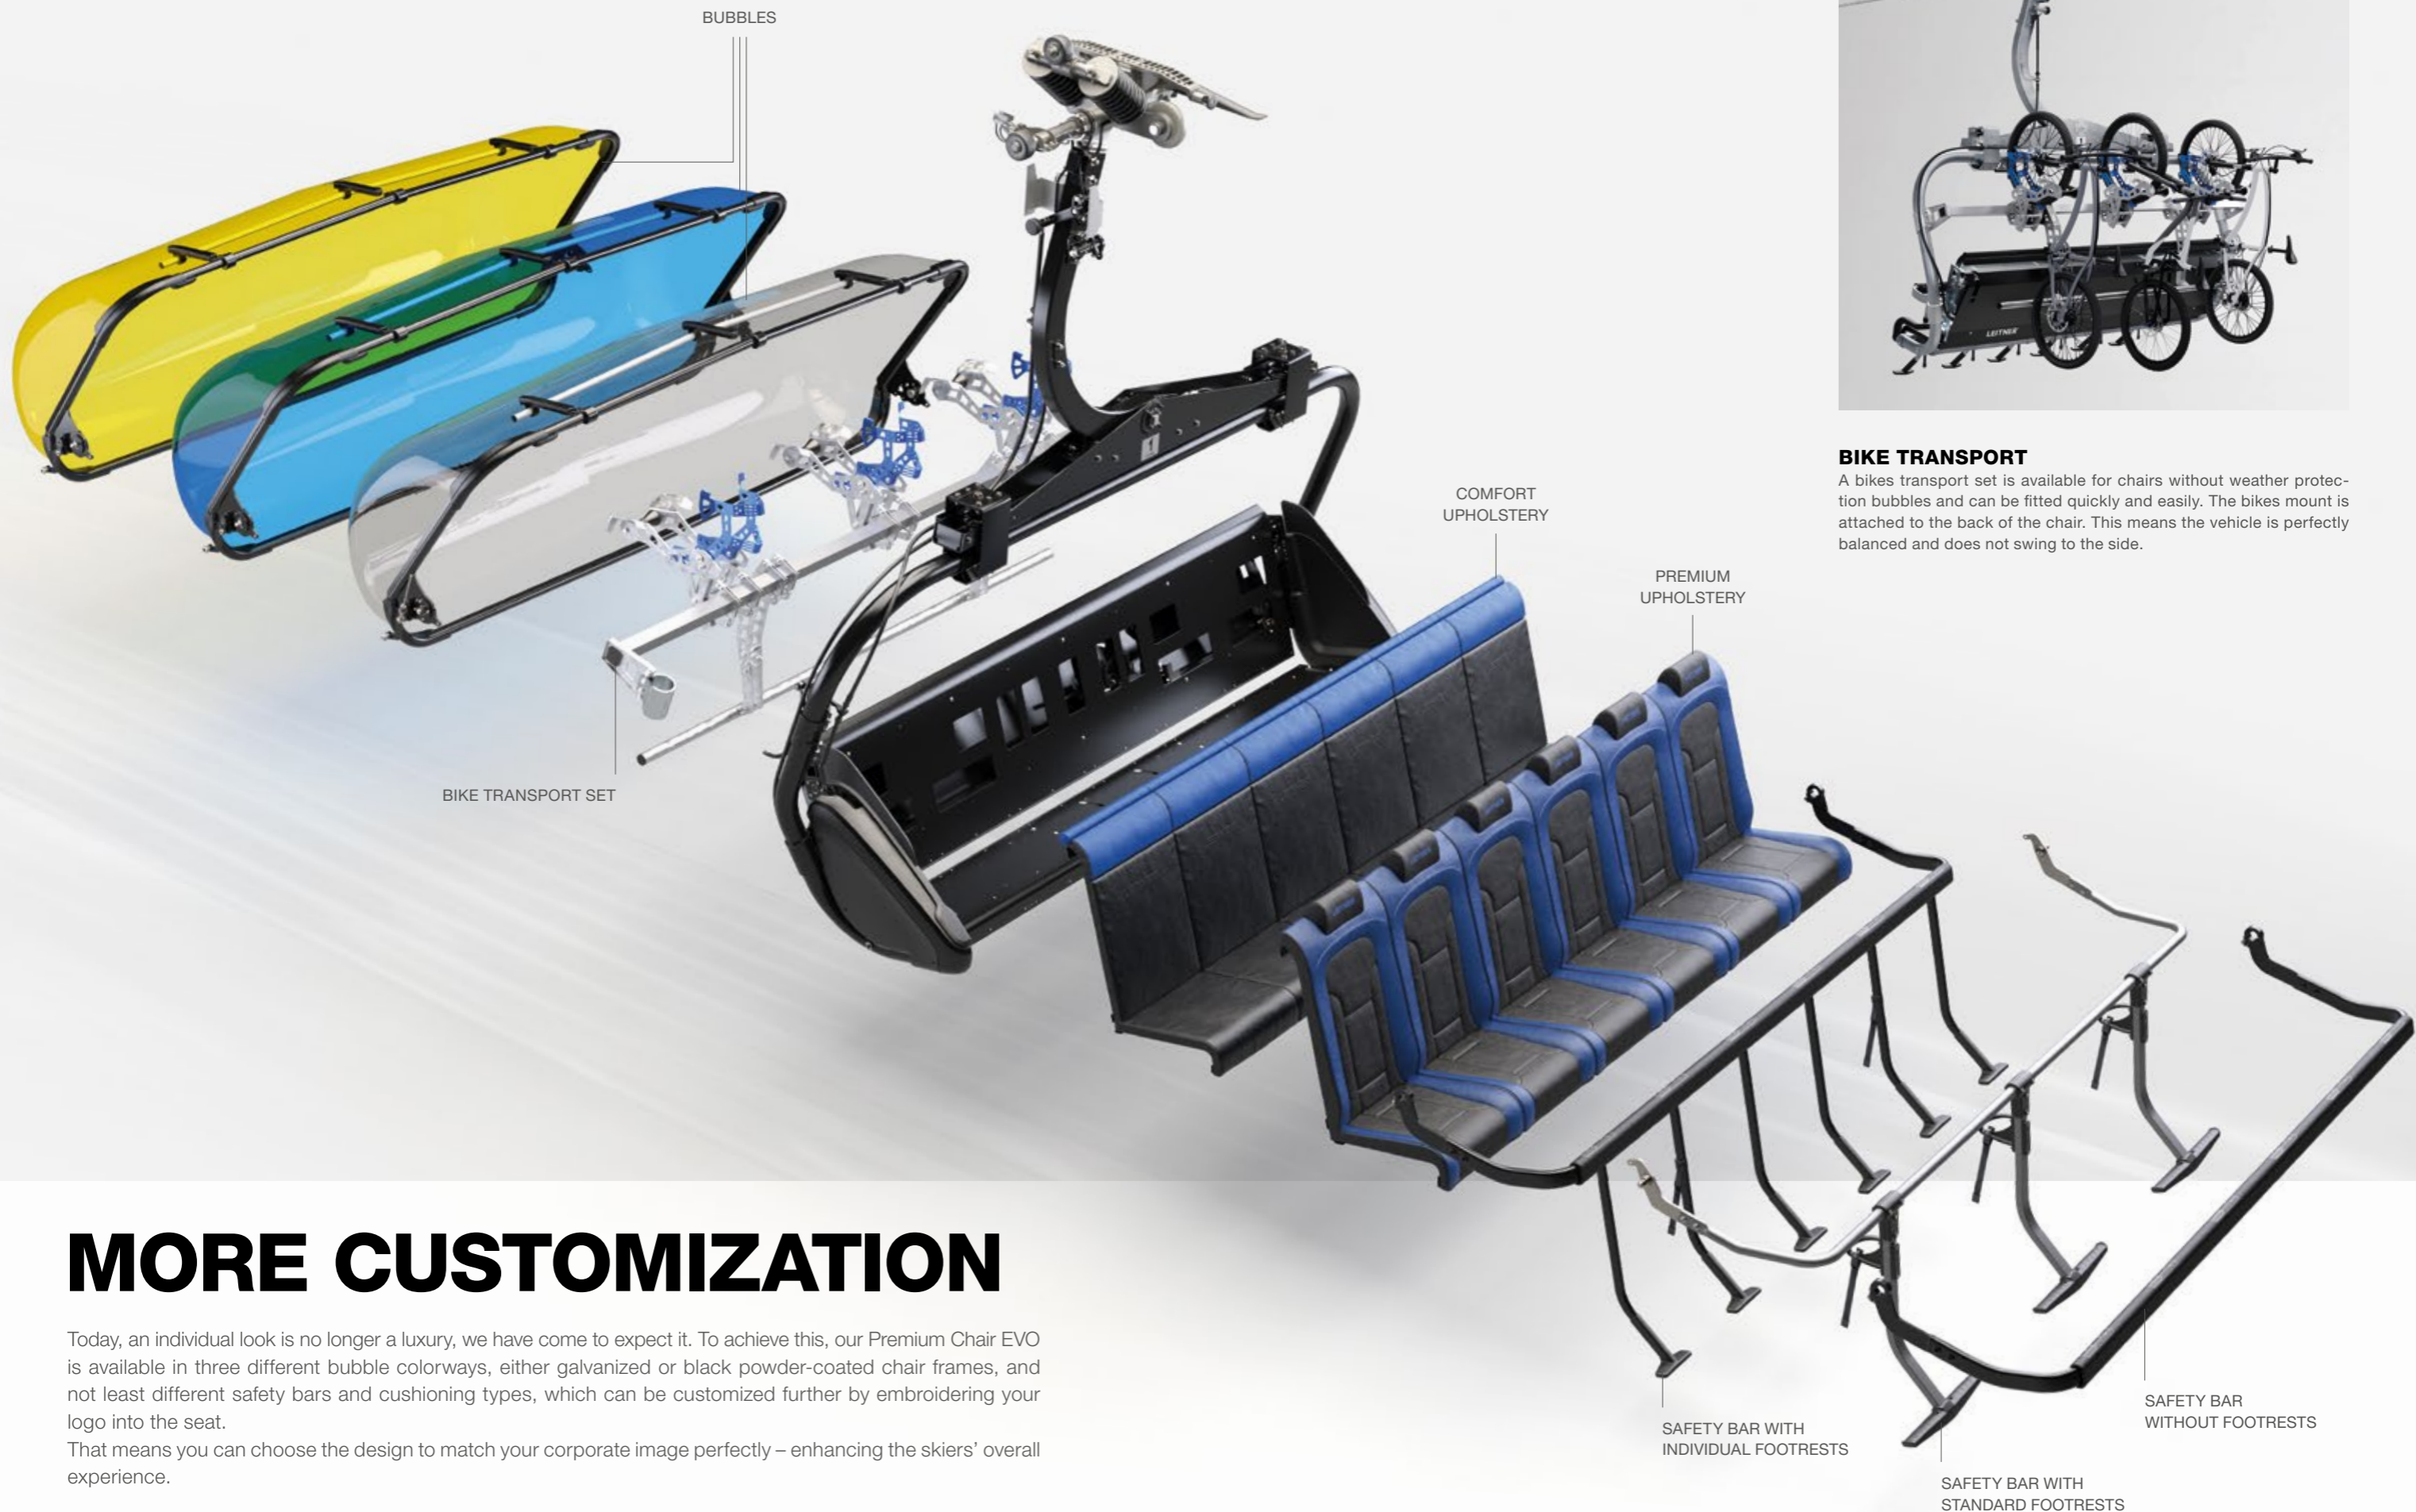

Simply remove the 3 bolts to open the newly designed side panel. Doing so provides the maintenance staff quick access to the mechanism inside. This development reduces maintenance time and thus simplifies service.

SIMPLE MAINTENANCE

We have made maintaining the Premium Chair EVO easier than ever before with the redesigned openings behind the backrest cushions. Quick and simple – keeping your maintenance cycles short.

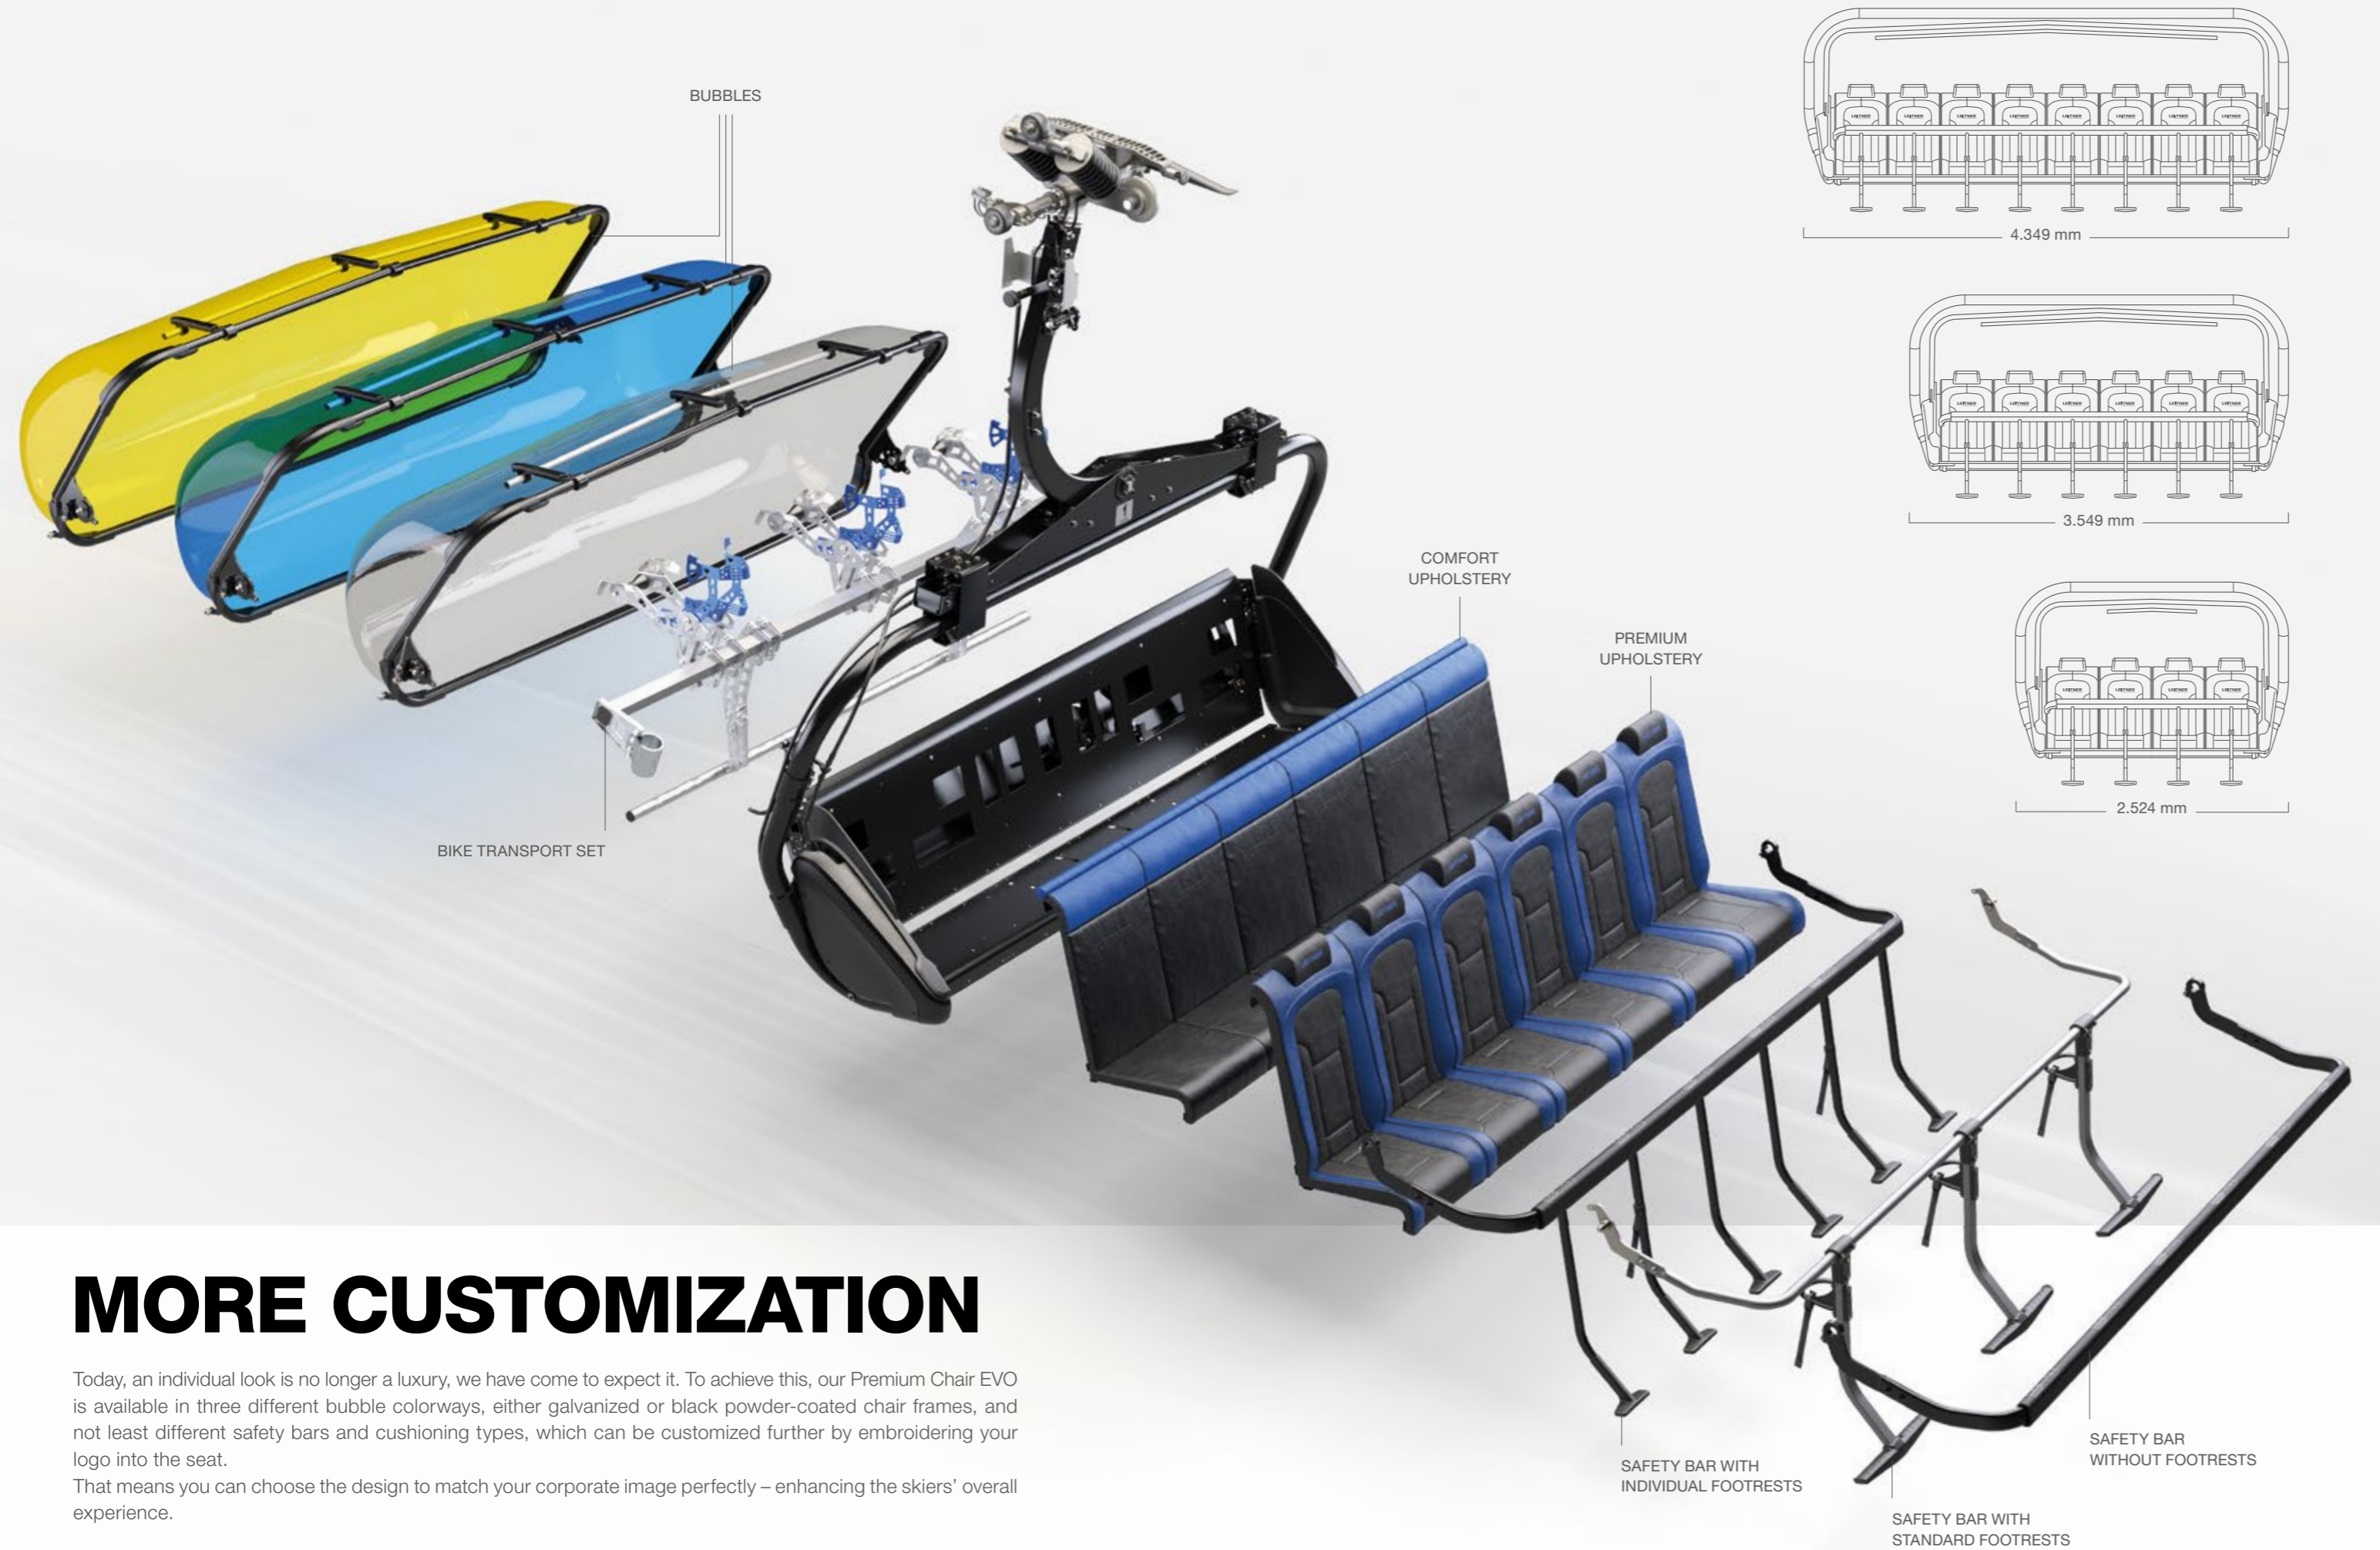

BIKE TRANSPORT

A bikes transport set is available for chairs without weather protection bubbles and can be fitted quickly and easily. The bikes mount is attached to the back of the chair. This means the vehicle is perfectly balanced and does not swing to the side.

MORE CUSTOMIZATION

Today, an individual look is no longer a luxury, we have come to expect it. To achieve this, our Premium Chair EVO is available in three different bubble colorways, either galvanized or black powder-coated chair frames, and not least different safety bars and cushioning types, which can be customized further by embroidering your logo into the seat. That means you can choose the design to match your corporate image perfectly – enhancing the skiers' overall experience.
