Length	3.887 m	Vehicles	132
Height difference	1.212 m	Power (kW)	1.660 kW
Throughput per hour	3.000	Towers	27

In 2017, LEITNER ropeways launched an upgraded version of the Diamond cabin: The Diamond EVO is the symbiosis of the successful Symphony and Diamond models, which mark the dawn of a new age with their construction, finishing and look. The Diamond EVO cabin – EVO is short for Evolution – was premiered this winter with the opening of the Spieljochbahn. The new cabin builds on the familiar Diamond model and is available either with sliding doors and fixed components along the side face, or with full-size sliding doors along the side face.

The new main frame and outer profile are based on the Pininfarina design of the Symphony cabin. Features of the new Diamond EVO include the slimmer support structures and the option of equipping the exterior lighting with LED strips integrated in the support profiles. The Diamond EVO cabin's modular design offers an impressive array of customization options.
