PisaMover

Pisa – IT – 2016

Length	1.760 m	Vehicles	2
Height difference	6 m	Power (kW)	1.000 kW
Throughput per hour	1.132		

With the official opening of the MiniMetro PisaMover on 18 March 2017, LEITNER is heralding a new, sustainable era of mobility. PisaMover will relieve the Tuscan city of almost all commuter road traffic. In addition to this, the ropeway will play an important role in local transport and improve connections to the existing public bus network.

The ropeway will take passengers from Galileo Galilei airport to the main train station in the city center in five minutes. Together with a new commuter car park and an improved network of bike paths, MiniMetro will reduce road traffic and make Pisa a more attractive and better place to live. The new MiniMetro in Pisa is the first ropeway of its kind equipped with the gearless drive system LEITNER DirectDrive.
