

CD6C

Valena

Passo del Tonale (TN) – IT – 2023

Length	682 m	Vehicles	45
Height difference	123 m	Power (kW)	370 kW
Throughput per hour	3.000	Towers	6

A new 6-seater chairlift powered by the energy- efficient, resource-saving LEITNER Direct- Drive was built in Val di Sole. The popular Pontedilegno-Tonale ski resort offers its guests 100 kilometers of slopes, which can be accessed using 30 ropeways. While descending, winter sports enthusiasts can enjoy a view of the peaks of the Adamello Group.

Equipped with bubbles and Premium heated chairs, the CD6C “Valena” can carry 3000 people per hour and offers significantly more comfort than its 2002 predecessor. The new ropeway is designed for year-round operation and allows summer sports enthusiasts to carry their bikes a distance of 684 m in just three minutes.
