LEITNER demonstrates its future-oriented and customer-focused approach at this year's Mountain Planet in Grenoble

Following the most successful year in the company's history, LEITNER will present its performance and innovation in France, highlighting the latest trends in new and service systems to its customers.

The summer trend that has emerged in recent years will continue to be of significant economic interest to our customers in the future. In addition to traditional hiking, access to summer ropeways with bikes is becoming increasingly popular. LEITNER will present its full range of bike transport solutions at the ‘Mountain Planet’ trade fair, featuring well-designed products for chairlifts, gondola lifts, and surface lifts that are easy to install and operate.

LeitPilot: autonomous operation for gondola lifts

LEITNER is showcasing its autonomous LeitPilot system at the trade fair.

Visitors can learn more about this system and autonomous ropeway operation through individual components, videos, and animations. Additionally, LEITNER experts will be available to answer any questions.

The company will also be presenting its latest 2S technology development in Grenoble. LEITNER is showcasing an innovative further development of the revised 2S system's mobile supports, which limits the sag of the hauling rope when the line is empty in rare cases of need, particularly with very long spans.

In the cabin segment, LEITNER will present the proven 3S Luxury Cabin Symphony and the Premium Cabin Diamond EVO. The LEITNER booth will also feature two 6-seater Premium Chairs EVO, available in both summer and winter edition.

In addition, a separate area is dedicated to LEITNER's retrofit and service offerings, which have become an important aspect of our business. At the LEITNER stand, customers will be able to talk directly to service staff about terminal maintenance, cabin refurbishment, retrofitting of existing systems and our one-stop shopping experience in the online shop.

Along with ropeway innovations, we also prioritize digitalization. The certified digital logbook has been enhanced to allow for more personalized adjustments to the legally required documentation for ropeway operations. Additionally, we will present further digital services for ropeway management and customizable maintenance plans.

Visit us at booth N°1310, we look forward to meeting you.
